Study Skills Workshops

2018-2019 Schedule

Study Smarter. Not Harder.

"It is my experience that I can tutor content until I am blue in the face, and that may raise a student's grade ten to fifteen percent for their next exam, but if I work on developing daily homework routines, organizational skills, note taking systems and study habits the effects will last whether I see the student once or regularly."

-Paul Kinkaide Owner Success 2000 Study Centres

Study Skills and **Test Taking Strategies** are approaches applied to learning.

Practice and regular use of these skills is vital to high achievement in school. Mastery of these skills is indispensable for use throughout one's life in the workplace as well. We have noticed, based on our experiences working with students in St. Albert and the surrounding communities for the past 25 years, that many students have little knowledge of how to use study skills to their advantage. Learning how to study effectively, how to organize time and materials, or how to take complete and detailed notes efficiently are all skills that need to be learned and practiced to achieve success.

The 2018-2019 Study Skills Workshops will be offered on Sundays. The program's flexibility allows you to pick and choose which workshops you would like to attend. The workshops are designed to be useful for all ages of learners from grade 6 to adult levels. This flyer contains all the dates and times for the workshops scheduled during the second half of the 2018-2019 school year. Additional information will be provided monthly through email, or you can always call the office for more details.
